

Speech Path of Brevard – is dedicated to providing quality **Speech and Language Therapy Services for Children**. Early intervention is especially critical to achieve the best outcomes.

We Can:

- ❖ Provide services under many insurance plans (including Medicaid)
- ❖ Come to your location weekly to provide services in your office
- ❖ IF the need is consistent we can lease a space in your facility

The Speech Path Difference

- Speech Path treats a wide variety of conditions (feeding/swallowing, sensory related issues with feeding including texture aversions, oral motor strengthening, oral motor planning/Apraxia)
- Frequency/duration of services are tailored to each child's needs
- There is more freedom to focus on things that are functionally relevant to a child/family (for example, addressing "L" in a 3 year old because his name is "Landon".... school typically will not address these types of issues until age 5!)
- Speech Path has multiple therapists with diverse backgrounds to meet unique family needs for expertise and scheduling

Children are slipping through the cracks with the current system!

Some children do not qualify yet or are "borderline" and as a result, they will continue to lag behind. If they do qualify for assistance, the lengthy process sometimes puts the child further behind and specialized areas and needs are often missed.

Current Public Treatment Options... And Why You Should Choose Us Instead!

Brevard County Schools

- Only serve preschool & school age (3 yrs. & up) children
- Mandated 60 day timeline procedures (which slow the process)
- Require a lengthy 4-6 weeks of data collection prior to testing for language services
- Patients have to meet very specific criteria for eligibility
- Service has to be "educationally relevant"
- Programs do not treat feeding/swallowing issues
- Typically 30 minute sessions twice a week in groups of 3-5 with little time for personal attention
- Frequency/duration is determined by SLP availability due to extraneous duties (i.e. car duty, lunch duty)

Early Steps/Child Find

- Only serve birth to 3 years of age - in home/Children's Center
- Very specific criteria for eligibility
- Long wait lists in your area
- Families with 3-4 year olds must drive to schools for consultations and therapy and only receive 30 minutes due to SLP scheduling
- Sessions typically take place in groups versus 1-on-1
- Parents report vague responses when inquiring about service eligibility and qualifications
